

Precautionary measures amid COVID-19 outbreak

In order to protect the health of our employees, business partners and clients we have decided to take the following precautions effective immediately:

- Entry for people outside of the company is not allowed in either of our locations - Bratislava and Žilina.
- The company branch in Bratislava is closed and all the personnel works remotely from home (e.g. "home-office" work mode).
- Employees, based in Žilina, who are responsible for technical support for our clients are present in the company premises only during an inevitable time and in necessary numbers. The rest of the team works remotely from home, as well.
- All the services which FUERGY Industries j.s.a. provides 24/7 will be still available and fully covered.
- Until further notice, it is also required to organize all the meetings and consultations, if technically possible, via phone or video call. In case, you have certain meetings already planned, we ask you to contact all the parties involved immediately and agree on a new date and tools to be used.
- In both of our premises, there are high hygiene standards applied. Please stay safe and follow all the recommendations regarding personal hygiene, as well.

The precautions mentioned above have been effective since March 12th 2020 until further notice. We will continuously monitor the situation and in case of any changes, we will contact you again.

Thank you for understanding,
Team FUERGY Industries j.s.a.
